

GPS, Wireless Tech & Internet make **CARSHARING** possible

Smart phones & standard data  
make **TRANSIT APPS** possible

GPS, smart phones & AI  
make **E-HAILING & RIDESHARING** possible

UBER, LYFT, CHARIOT

**Technology makes sharing easy**

**&**

**sharing is good!**

## **CARsharing**

**12 personal cars = 1 shared car**

**Greatly reduced demand for parking**

## **RIDEsharing**

**1.2 people/personal car → more!**

**Reduces congestion**

**SHARING** 

**SUM4All**

**Equitable**

**Efficient**

**Clean**

**Safe**

We are getting a chance to  
**DO-OVER**  
Cities

<https://www.youtube.com/watch?v=DeUE4kHRpEk&t=2s>

# DONE RIGHT, CITIES COULD EXPERIENCE THIS:

**Mobility  
Delivery:**  
Shared  
transport

**Urban Form:**  
Compact &  
accessible

**Streetscape:**  
“Complete”  
streets &  
shared  
transport

**Energy:**  
Decarbonized  
& resilient

**Labor:**  
Refreshed  
social contract

**Data:**  
Open &  
standardized

**Tax Revenue:**  
Transitioned  
to real-time  
user fees

**Pricing:**  
Fair user fees  
across all  
modes

SKEPTICISM

We already live in transport  
**HELL**

# Underpricing

is the root of most of the problems  
we experience today in transportation.

**AVs – free of the cost (or personal time) of drivers –**  
**will MAGNIFY current problems**  
by making car travel even cheaper.

What is my cost for this trip?

Free pollution of our air

Delhi 2016

Free or almost free on-street parking

Free travel during peak times

Free access to curbs for pickup, dropoff, and delivery.

What if we had

**#7 Fair User Fees Across All Modes**

**?**

# Shared Mobility Principles for Livable Cities

The future of mobility in cities is multimodal and integrated. When vehicles are used, they will be right-sized, shared\*, and zero emission. These principles guide urban decision-makers and stakeholders toward the best outcomes for all.

- Plan cities and mobility together**
- Focus on moving people, not cars**
- Encourage efficient use of space and assets**
- Engage stakeholders in decision making**
- Design for equitable access**
- Transition towards zero emissions**
- Seek fair user fees**
- Deliver public benefits via open data**
- Promote integration and seamless connectivity**
- Automated vehicles must be shared**

\*Shared vehicles include all those used for hire to transport people (mass transit, private shuttles, buses, taxis, auto-rickshaws, car and bike-sharing) and urban delivery vehicles.

SharedMobilityPrinciples.org  
#LiveableCities  
#10principles

## **Shared Mobility Principles for Livable Cities**

Multimodal, integrated.

Vehicles are right-size, shared, zero emission.

1. Plan cities and mobility together
2. Focus on moving people, not cars
3. Encourage efficient use of space and assets
4. Engage stakeholders in decision making
5. Design for equitable access
6. Transition towards zero emissions
7. Seek fair user fees across all modes
8. Deliver public benefits via open data
9. Promote integration and seamless connectivity
10. Automated vehicles must be shared

**[SharedMobilityPrinciples.org](https://SharedMobilityPrinciples.org)**

## **Shared Mobility Principles for Livable Cities**

Multimodal, integrated.

Vehicles are right-size, shared, zero emission.

1. Plan cities and mobility together
2. Focus on moving people, not cars
3. Encourage efficient use of space and assets
4. Engage stakeholders in decision making
5. Design for equitable access
6. Transition towards zero emissions
- 7. Seek fair user fees across all modes**
8. Deliver public benefits via open data
9. Promote integration and seamless connectivity
10. Automated vehicles must be shared

**[SharedMobilityPrinciples.org](https://SharedMobilityPrinciples.org)**

## SMPLC#6 Transition to Zero Emission & Renewable

# What if we had

**#3** Encourage efficient use  
of space and assets

**?**

space required  
to transport **60 people**

car

bus

bicycle

space required  
to transport **60 people**

car

Here are 200 people in 177 cars

- vehicles
- roads
- lanes
- curbs

**More SHARING**

Inadequate data standards  
to support this new pricing  
&

#8 Public benefits via open data

No mapping standards for curb and lane use

Open Transport Partnership

#### #4 Engage stakeholders in decision making

## #9 Work toward integration and seamless connectivity

# SHARED MOBILITY PRINCIPLES FOR LIVABLE CITIES

#6 Transition to Zero Emission & Renewable

#3 Efficient Use of Resources

#7 Fair User Fees across all modes

#8 Public benefits via open data

#9 Work toward integration & seamless connectivity

**#10 AVs in dense metros must be electric & shared**

Standard APIs

Connected  
& integrated

Zero  
Emission

Efficient use  
of resources  
**SHARED!**

Fair User  
Fees

Transformed economics mean that  
Where AVs drive matters (fix pricing!)

Exurban

Urban

Self driving or not

*same problems*

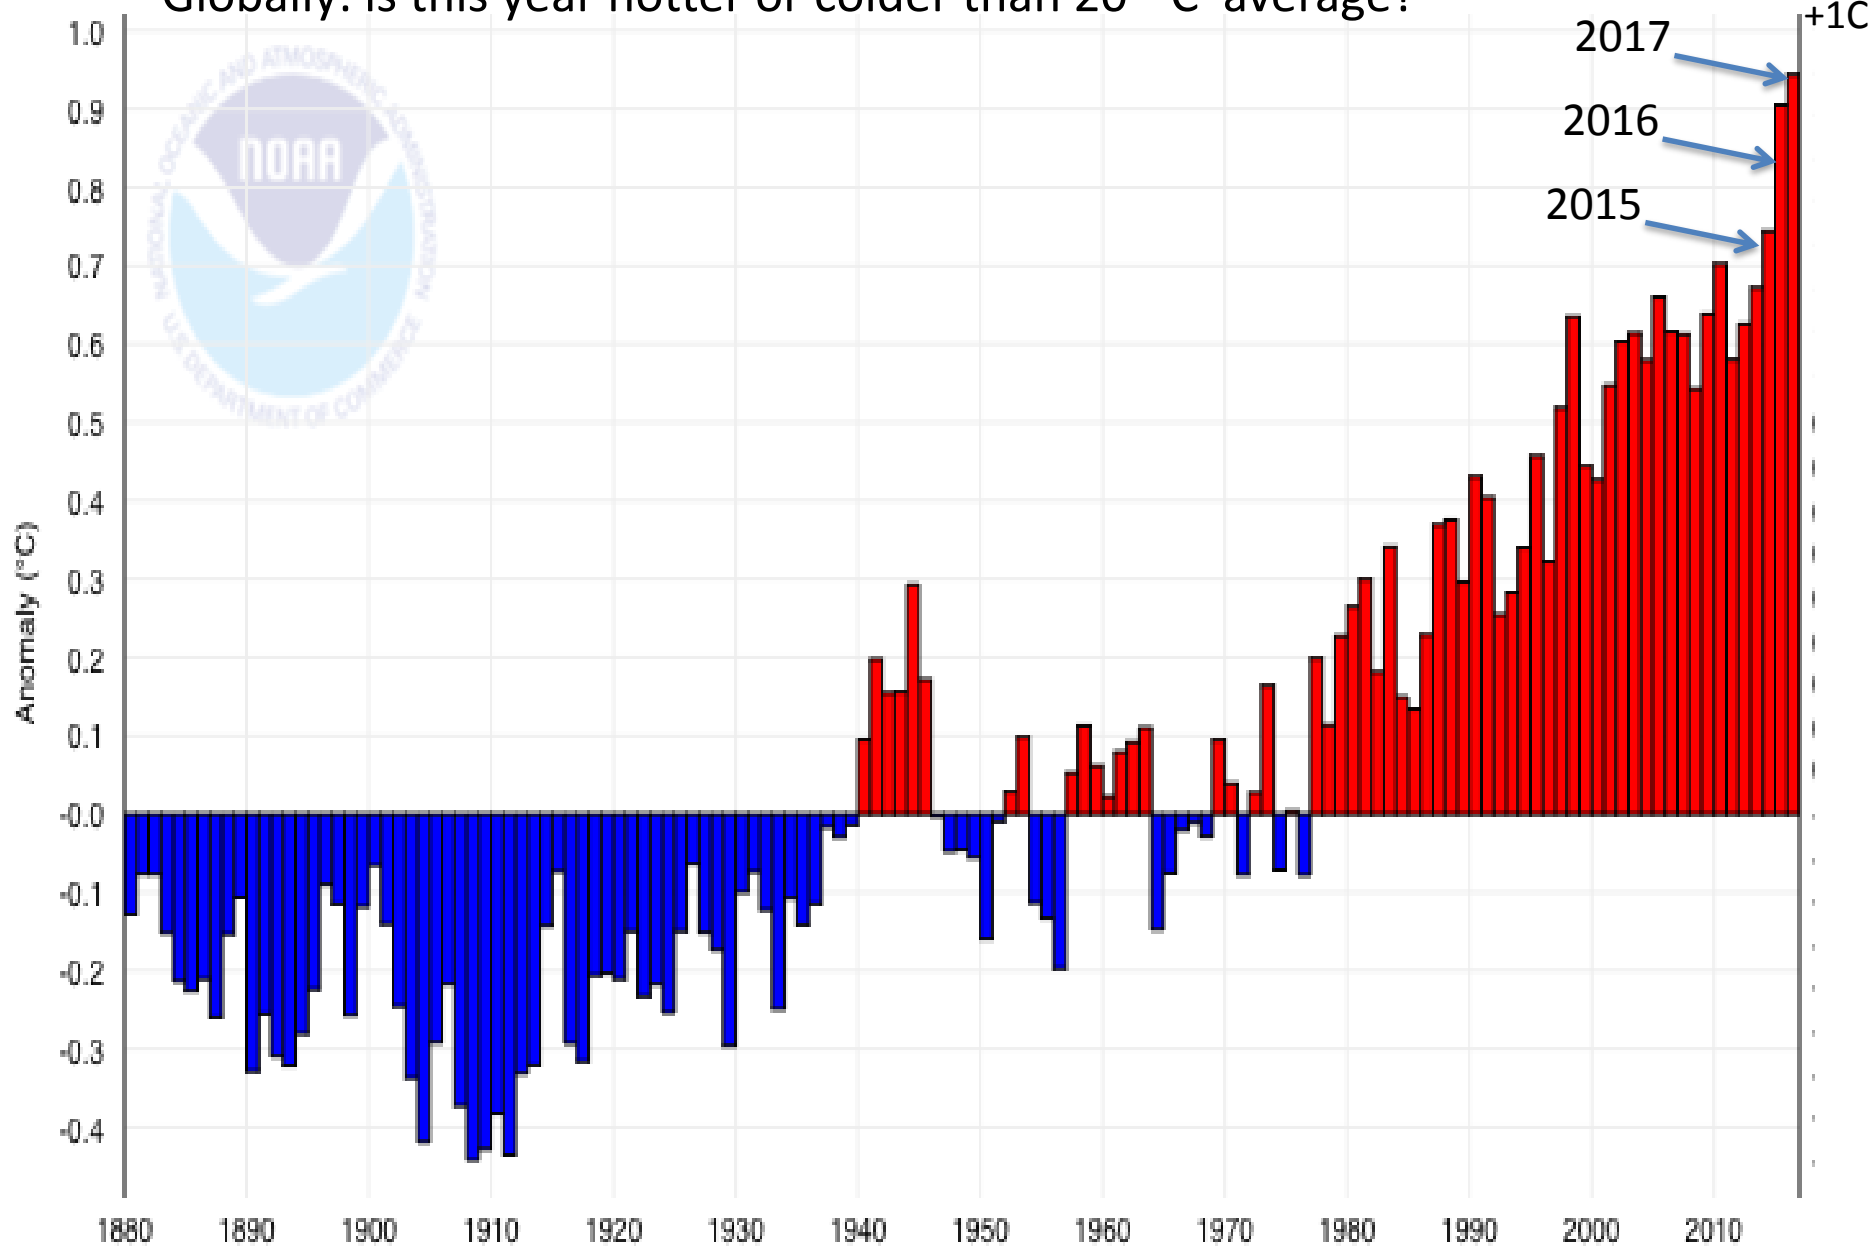

**METAL BOXES ON SCARCE STREETS**

**We don't have time for delay**

## Scientists predict +5-6C by 2100 under BAU

Globally: is this year hotter or colder than 20<sup>th</sup> C average?

**Mission:** Channel the tech-driven disruption in the mobility sector to (re)build cities that are sustainable, livable, and just.

# INFRASTRUCTURE IS DESTINY

We have to get this  
transition right.

# Resources

[SharedMobilityPrinciples.org](https://SharedMobilityPrinciples.org)

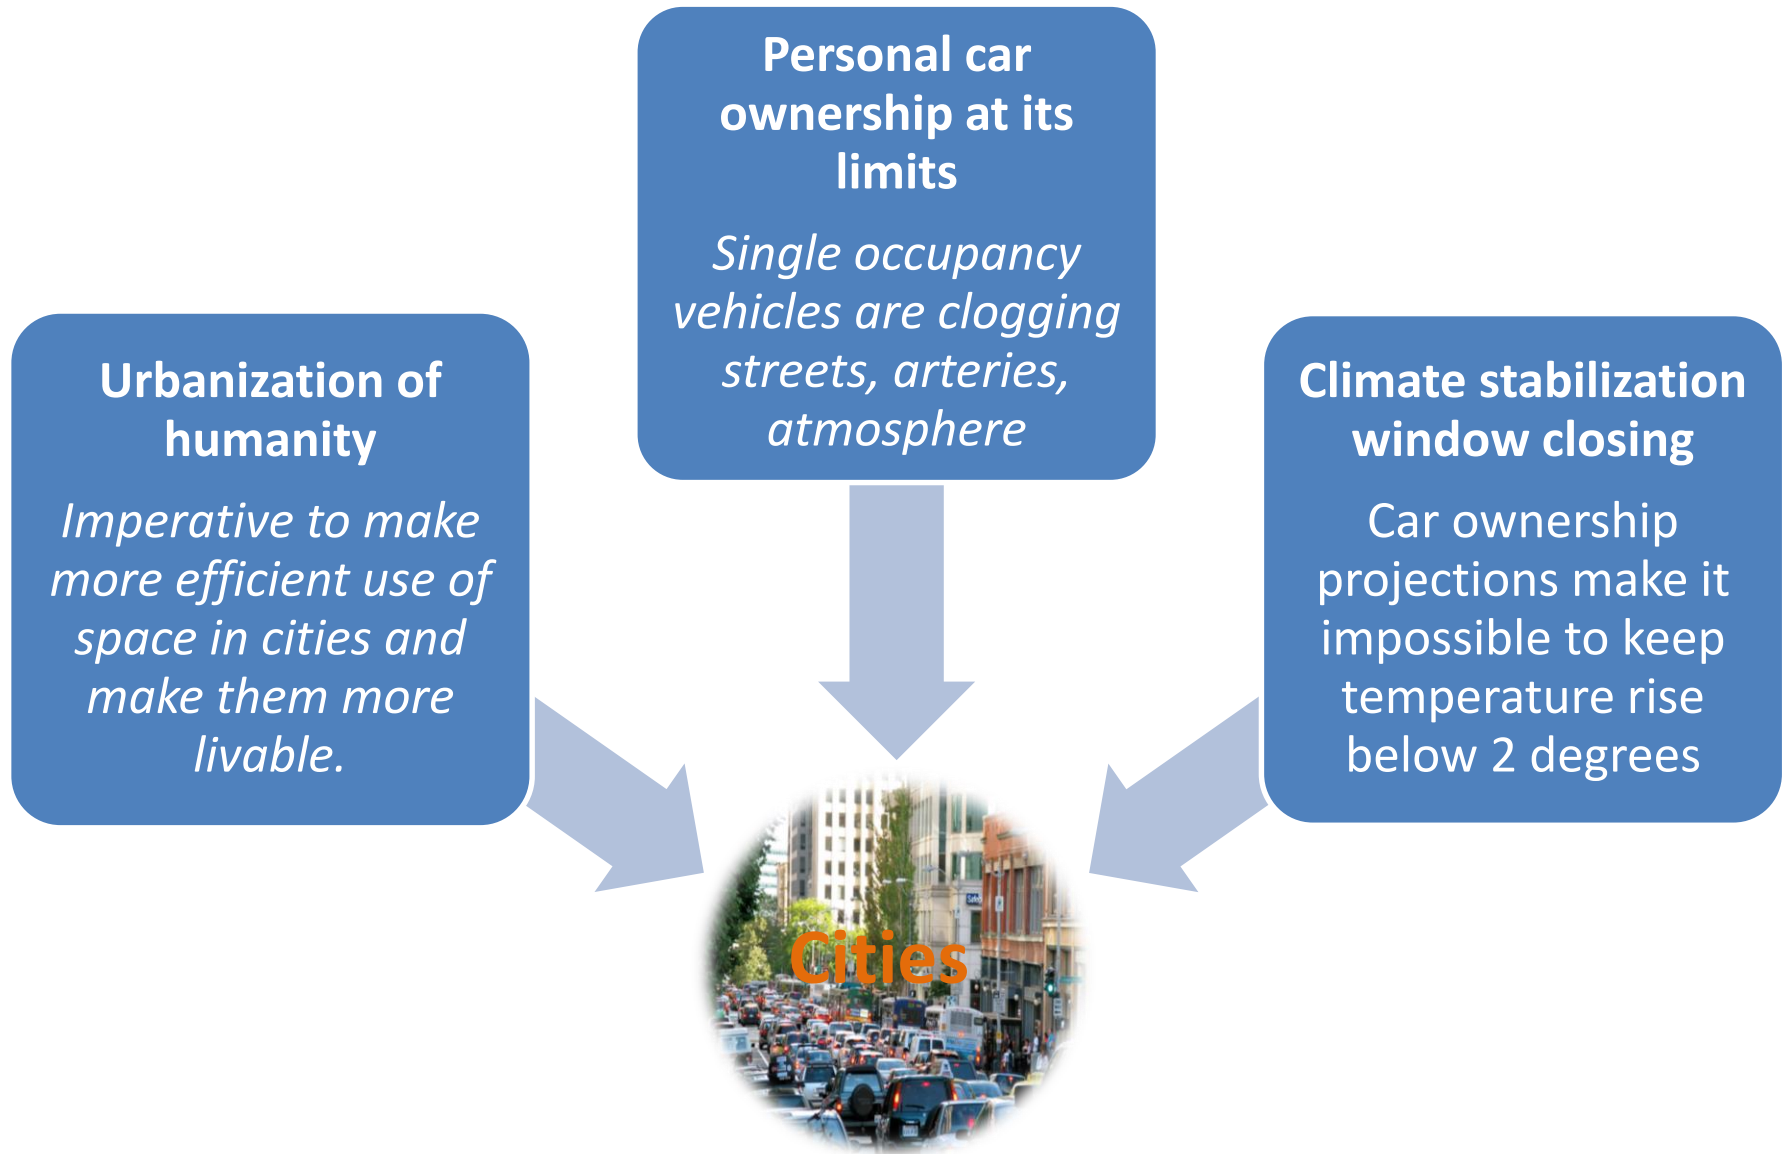

[bit.ly/avheaven](https://bit.ly/avheaven)

**OPEN TRANSPORT PARTNERSHIP**

[Sharedstreets.io](https://Sharedstreets.io)

[robin@osmosys.org](mailto:robin@osmosys.org)

# THREE CONVERGING GLOBAL PROVOCATIONS

# AND...A FOURTH PROVOCATION AFFORDS US AN HISTORIC OPPORTUNITY FOR AN URBAN “DO-OVER” ...

## AVs are Inevitable

Available for sale by 2020 say  
Audi, BMW, Ford, GM, Toyota

Per BCG's study, by 2035, the  
world will own **12M** fully  
autonomous vehicles and  
**18M** partially autonomous  
vehicles

## ...and will profoundly disrupt:

- Mobility Delivery Models
- Urban Form
- Labor
- Tax Revenues
- Streetscapes
- Social norms about car ownership

# ...SO WE MUST USE “JIU-JITSU”

Like Jiu-jitsu, rather than resisting this technological disruption, it uses the *momentum* of these provocations to rally existing efforts...

Behind **one common vision**:

clean, shared, multimodal **transport**  
creating livable, sustainable, just **cities**.

# THANK YOU

**“The infrastructure we build over the next three years will determine the fate of humanity.” --**  
Christiana Figueres

**(2) Underpricing**  
is the root of most of the problems  
we experience today in transportation.

**AVs – minus the cost (or personal time) of drivers –  
make using a car cheaper still, and  
**MAGNIFY** current problems  
associated with underpricing.**

We over consume  
poorly priced resources.

Right pricing is a way to allocated  
scarce resources

Right pricing is a way to allocated  
scarce resources (streets, curbs)

maybe per square meter of street  
space? “geometric pricing”

regardless of whether you are  
a personal car, a taxi, a bus, a delivery truck, or AV

## (4) A chaotic unplanned jobs transition

Will result in a lot of suffering

Cities need to engage with the stakeholders  
to create a transition plan.

# Some first steps

**Lack of vision.**

**Make the vision clear with more shareable content** in video, print, the arts. We need to create awareness and demand pull for this future.

**Underpricing is root problem & AVs will magnify these problems**

**Connect existing solutions to the impending AV revolution** & impacts.

**No data standards to support elements that need to be priced**

**Open Transport Partnership.**

Developing standards and partnerships between cities & service providers.

**A chaotic unplanned jobs transition**

**Start talking with stakeholders about a transition plan.**

Focus on solving for efficient use of scarce streets:  
throughput of people per square meter  
(right pricing; right allocation of street space)

We can leverage this transition to build **LIVABLE CITIES**

Eliminate 1.25m traffic fatalities world wide (95% caused by human error)  
40,000 in US, 4.6 m seriously injured in 2016

# Cheonggyecheon River in Seoul

BEFORE

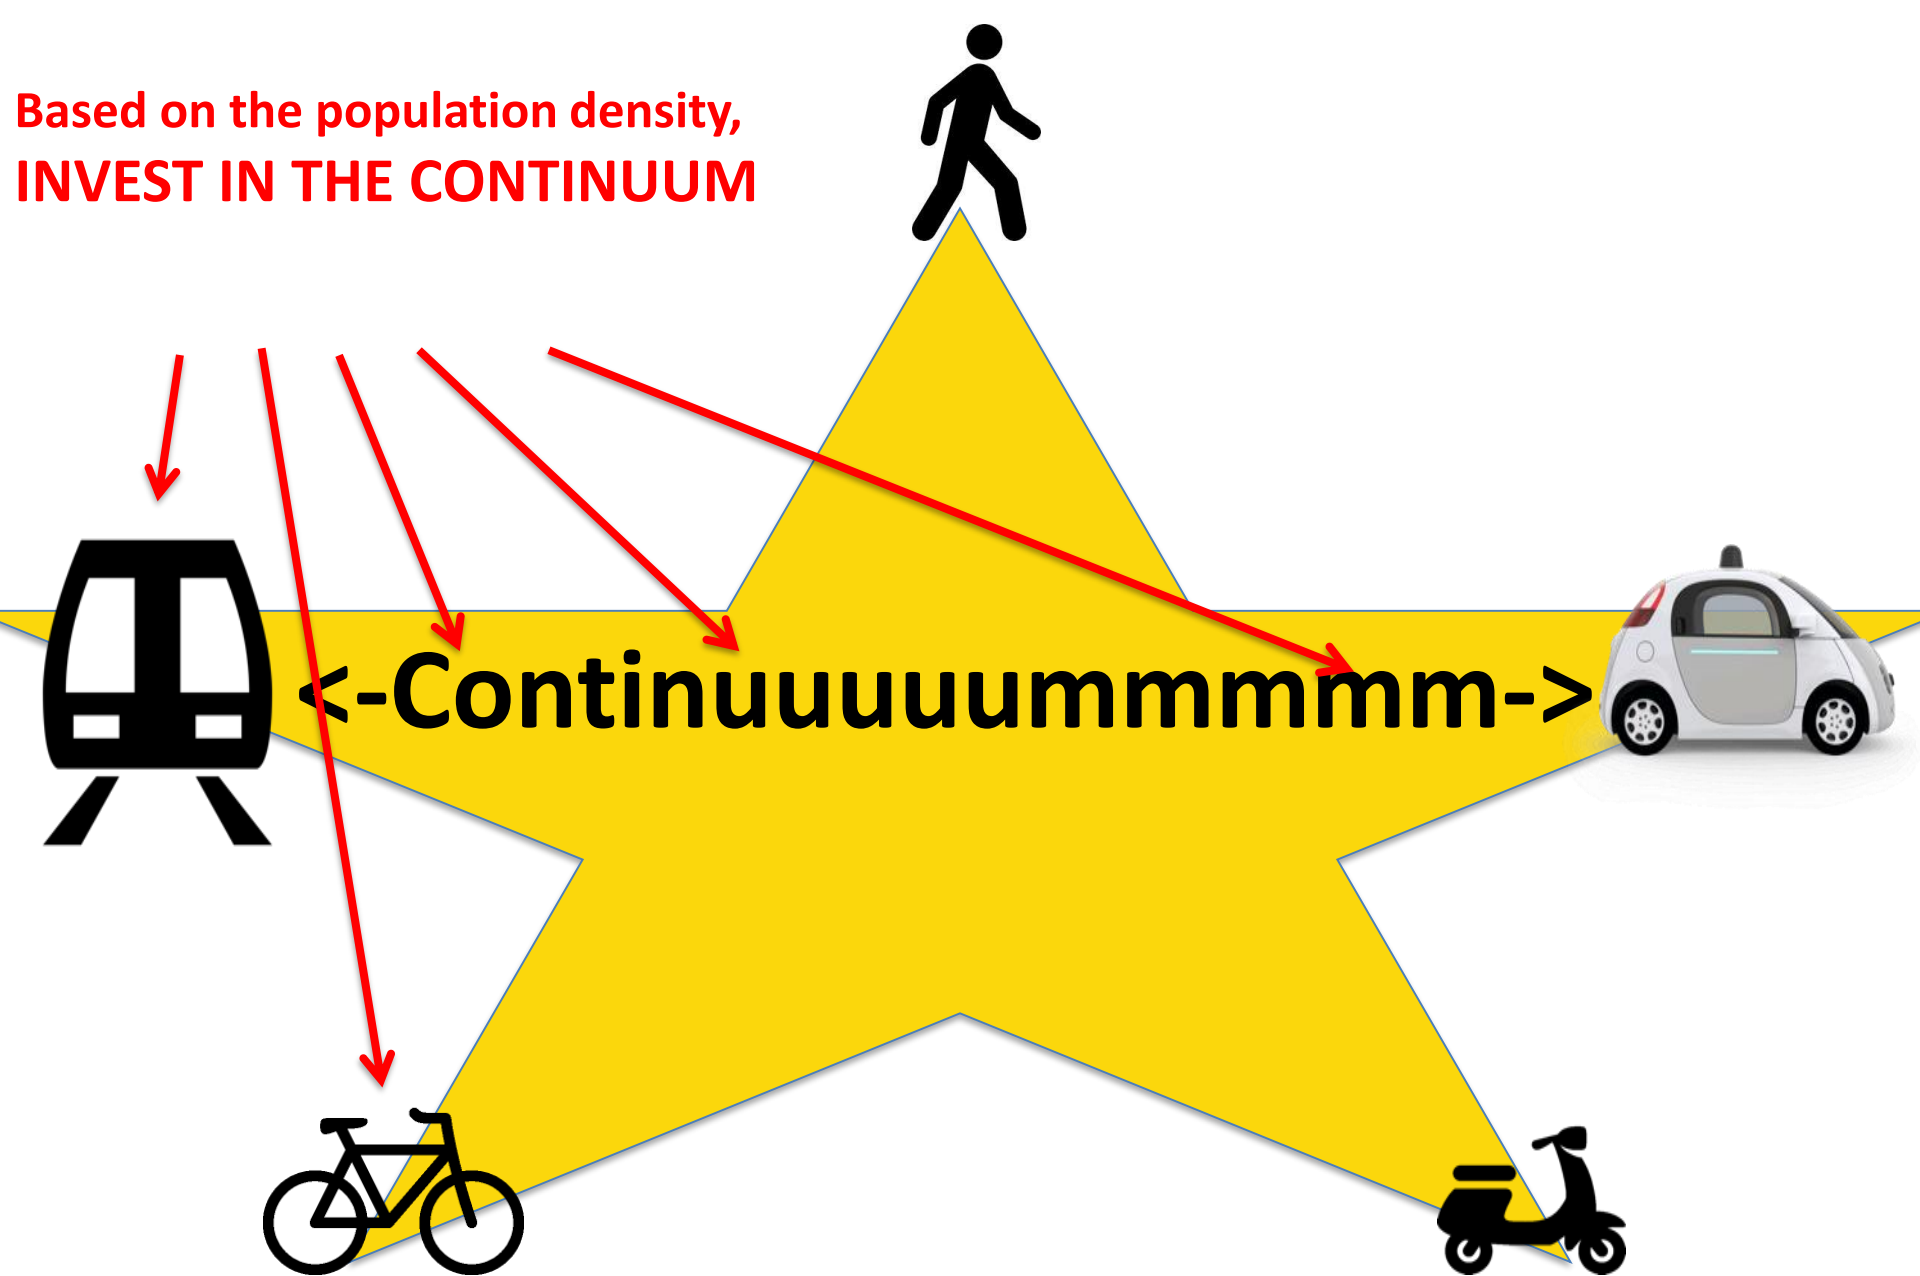

AFTER

Based on the population density,  
**INVEST IN THE CONTINUUM**

# **NEW MOBILITY PROTOCOL FOR LIVABLE CITIES**

## **PHASED**

- 1) Standard and pooled data for competitive & quality shared transport services**
- 2) Zero emission fleets**
- 3) Congestion sticks (pricing) & carrots (land use)**
- 4) AVs only in shared fleets**

Cities are in a **ONE TIME** position of POWER

They need to **align on shared principles**

**CLEAN   CONNECTED   EFFICIENT   SHARED**

# **INFRASTRUCTURE IS DESTINY**

CLEAN CONNECTED EFFICIENT SHARED

# INFRASTRUCTURE IS DESTINY

BUILDING THE WORLD WE WANT TO LIVE IN  
CAN

**We get to  
AV HEAVEN**

(1) A chaotic unplanned  
jobs transition

Will result in a lot of suffering, and  
slow the pace of transition to  
clean, shared mobility & more livable cities

# We don't have time for delay

Global Land and Ocean Temperature Anomalies, January-December

**Cities need to engage with the stakeholders  
to create a transition plan.**

## (2) Underpricing

is the root of most of the problems  
we experience today in transportation.

**AVs – free of the cost (or personal time) of drivers –**  
**will MAGNIFY current problems**  
by making car travel even cheaper.

Free pollution of our air

**We must transition to zero emission vehicles**

Delhi 2016

Free travel during peak times

**We must start congestion pricing**

Free or almost free on-street parking

**Parking policy is no longer be a useful policy tool  
when most trips are made with  
1) paid drivers or 2) self driving vehicles.**

## We must start charging for access to curbs

Free access to curbs for pickup, dropoff, and delivery.

(3) Inadequate data standards  
to support this new pricing

No mapping standards for curb and lane use

No uniform data requirements for  
multimodal shared transport mobility.

**<-Continuuuummmmm->**

**Coalition of cities is working with  
the OPEN TRANSPORT PARTNERSHIP  
to create uniform shared data standards for  
passenger transport & the street scape.  
Sharedstreets.io**

**By fixing NOW the problems  
that have us currently living in  
transport HELL**

**Most of our problems stem from**  
*underpriced* pollution, congestion, parking, roads.

**Without drivers**  
*– reducing trip costs by 35-60% --*

**AVs will amplify**  
**poor market signals & resulting bad behaviors**

# Underpricing

Inadequate &  
Poor Quality  
Infrastructure

Congestion  
of streets &  
curbs

Poor  
**Air Quality**

Without drivers

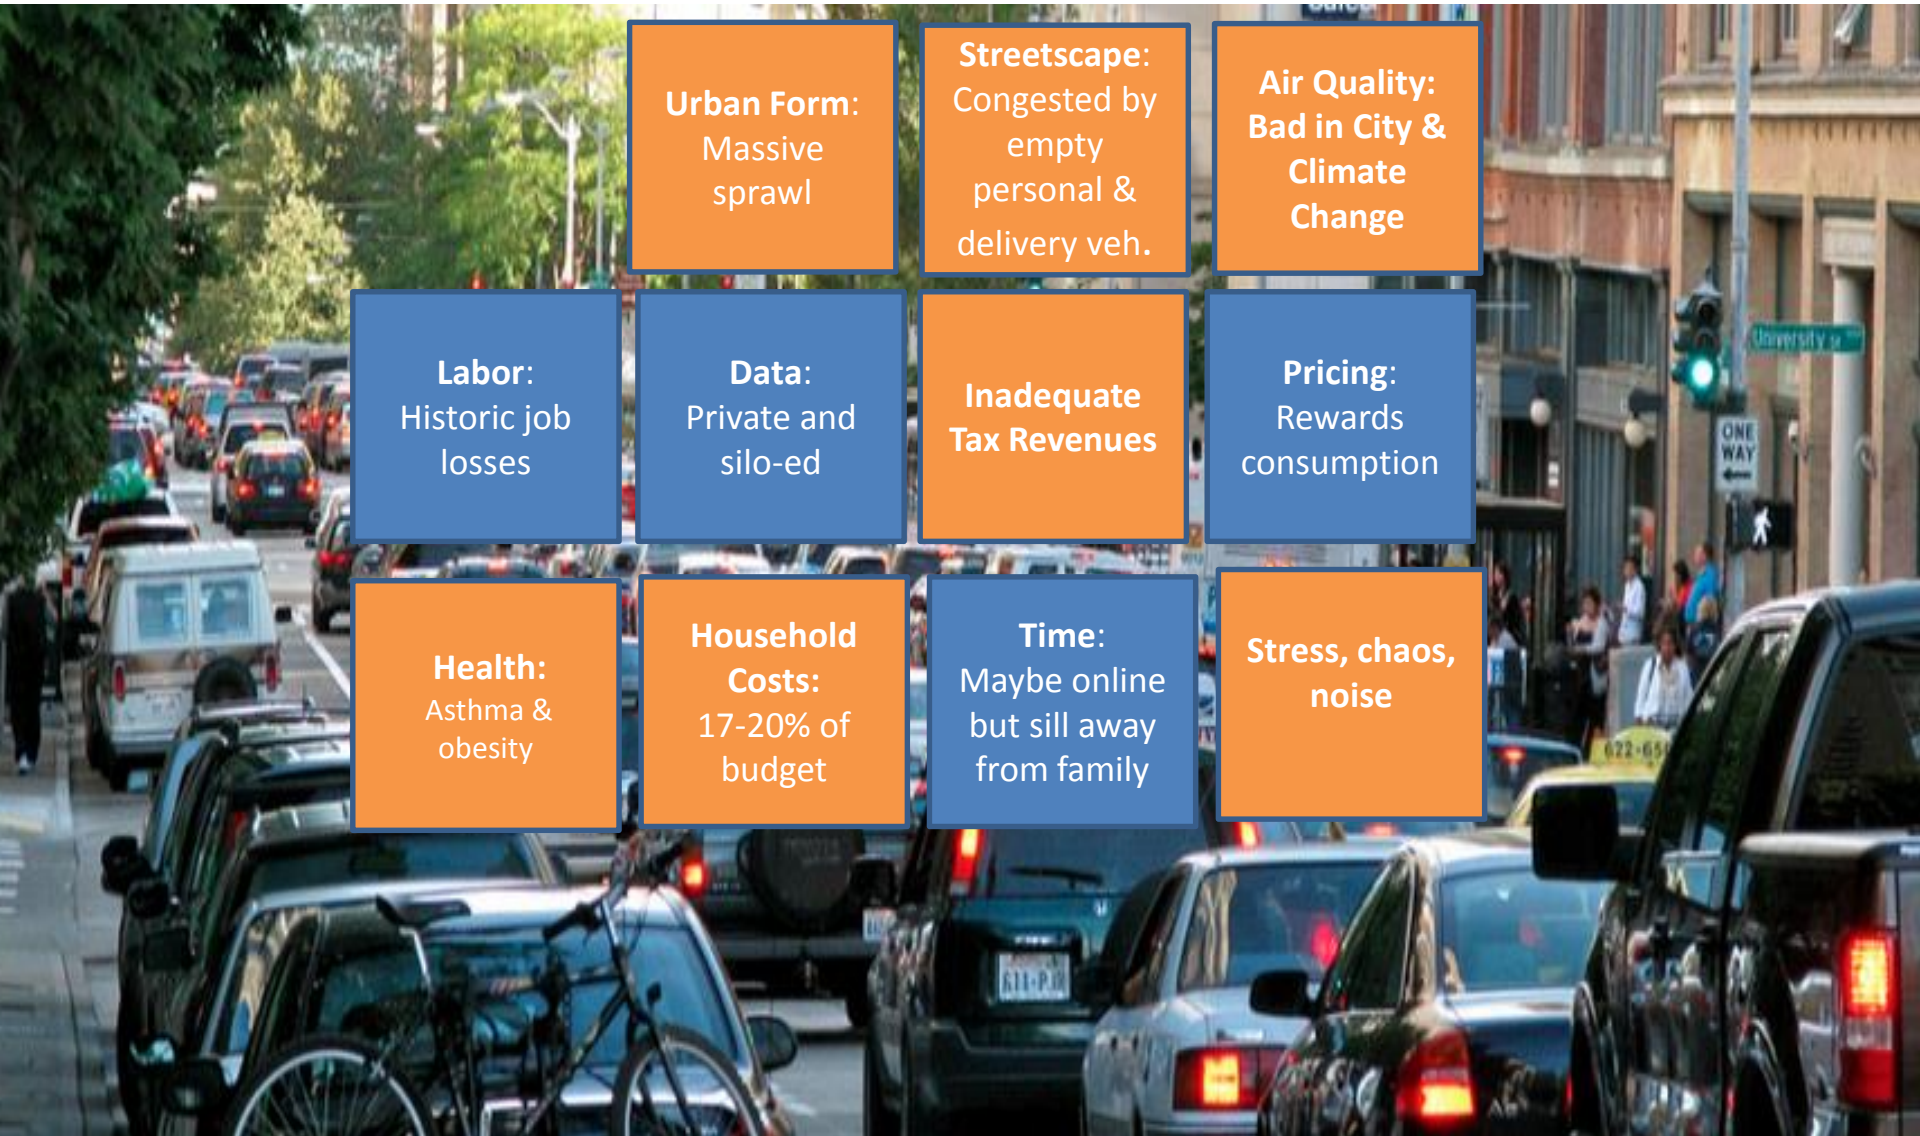

– *reducing trip costs by 35-60% --*

## AVs will amplify

poor market signals & resulting bad behaviors

# IF NOTHING IS DONE, STATUS QUO CONTINUES CITIES WILL EXPERIENCE THIS:

**Urban Form:**  
Massive  
sprawl

**Streetscape:**  
Congested by  
empty  
personal &  
delivery veh.

**Air Quality:**  
Bad in City &  
Climate  
Change

**Labor:**  
Historic job  
losses

**Data:**  
Private and  
silo-ed

**Inadequate  
Tax Revenues**

**Pricing:**  
Rewards  
consumption

**Health:**  
Asthma &  
obesity

**Household  
Costs:**  
17-20% of  
budget

**Time:**  
Maybe online  
but still away  
from family

**Stress, chaos,  
noise**

# IF NOTHING IS DONE, STATUS QUO CONTINUES CITIES WILL EXPERIENCE THIS:

**Urban Form:**  
Massive  
sprawl

**Streetscape:**  
Congested by  
empty  
personal &  
delivery veh.

**Air Quality:**  
Bad in City &  
Climate  
Change

**Labor:**  
Historic job  
losses

**Data:**  
Private and  
silo-ed

**Inadequate  
Tax Revenues**

**Pricing:**  
Rewards  
consumption

**Health:**  
Asthma &  
obesity

**Household  
Costs:**  
17-20% of  
budget

**Time:**  
Maybe online  
but sill away  
from family

**Stress, chaos,  
noise**

Today:

Lack of access for young, poor, elderly, us!

1.25m traffic fatalities world wide

(40,000 in US, 4.6 m seriously injured in 2016)

18% of household income on car

Increased cost of housing (to include parking)

Poor air quality & CO2 emissions

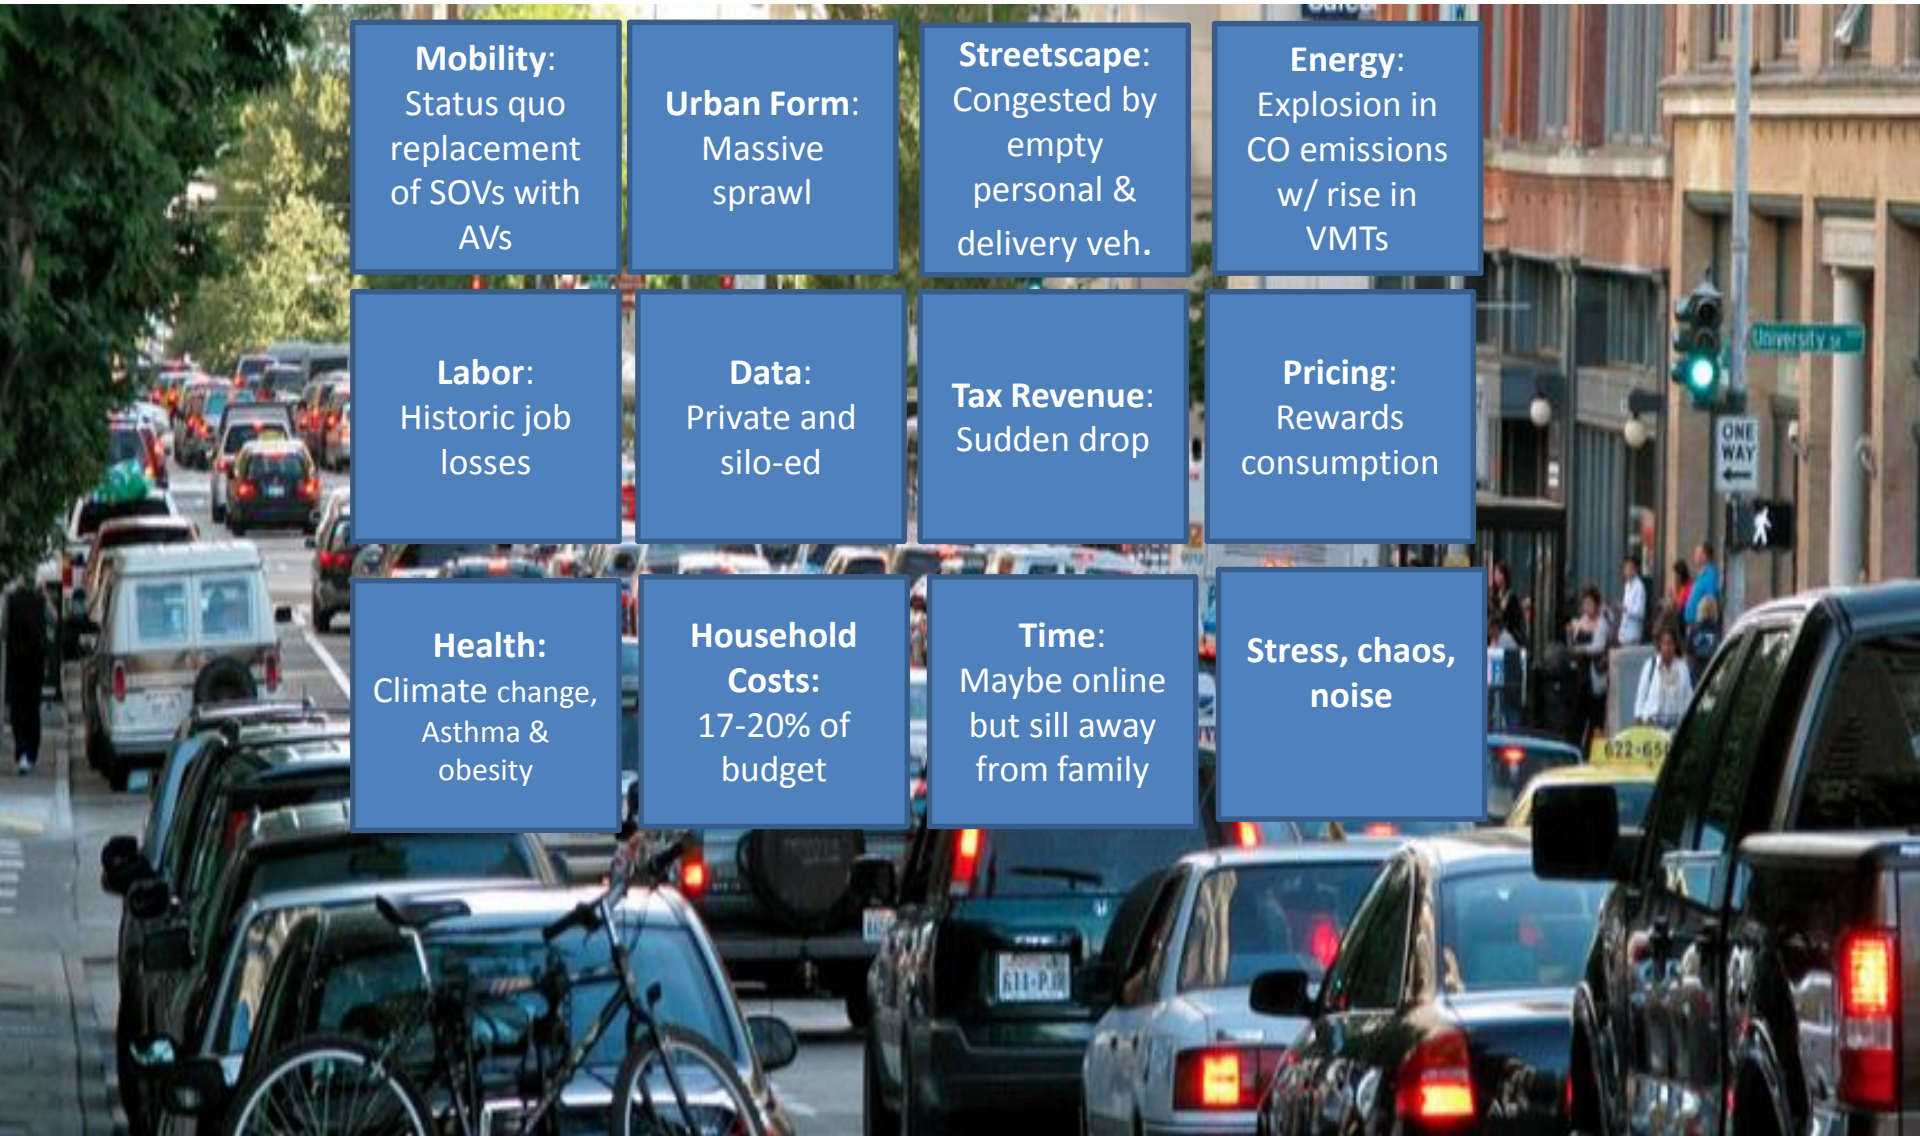

Hours wasted in congestion (productive?!)

Inadequate green space

Noise, chaos, stress

# IF NOTHING IS DONE, STATUS QUO CONTINUES CITIES WILL EXPERIENCE THIS:

## **Mobility:**

Status quo replacement of SOVs with AVs

**Urban Form:**  
Massive sprawl

**Streetscape:**  
Congested by empty personal & delivery veh.

**Energy:**  
Explosion in CO emissions w/ rise in VMTs

**Labor:**  
Historic job losses

**Data:**  
Private and silo-ed

**Tax Revenue:**  
Sudden drop

**Pricing:**  
Rewards consumption

**Health:**  
Climate change, Asthma & obesity

**Household Costs:**  
17-20% of budget

**Time:**  
Maybe online but still away from family

**Stress, chaos, noise**

## INADEQUATE FUNDING FOR TRANSIT AND TRANSPORTATION INFRASTRUCTURE

### **SMPLC#7 Fair User Fees across all modes**

- Road user fees
- Congestion pricing
- Parking & Pickup/Dropoff/Delivery
- Pollution tax
